

2007 Rain Barrel and Supply Sale

Sponsored by Lake County Soil and Water Conservation District, Lake County Stormwater Management Commission, Lake County Forest Preserve District

About the Rain Barrel

Plain Greek Pepper Rain Barrel - 50 gallon

The terra cotta colored plastic rain barrels are made from imported Grecian pepper barrels which were originally received in this country filled with delicious golden Greek peppers. The terra cotta rain barrels are 34" tall with a 23" diameter and hold approximately 50 Gallons.

All plastic rain barrels are made from re-cycled food grade barrels. These plastic recycled barrels have traveled many thousands of miles, and even though we have thoroughly cleaned them inside and out, and applied several coats of a UV polish, they may still have some small scratches and scrapes. This should be considered as part of the "character" of the Grecian rain barrels. **For reference:** Nick is 6 feet tall

Rain barrels have a screw on perforated top with inside screen mesh to keep out debris, bugs, pets and children, two top overflow male hose connections, a brass spigot, and a bottom drain plug. The overflow fittings allow excess water to be diverted into a second barrel (or third, or fourth or fifth etc.), or by attaching a hose, excess water can be diverted to any remote area such as a garden or flower bed. The brass spigot is shipped inside the barrel and will need to be screwed into the pre-installed plastic fitting by the customer. The brass spigot can be interchanged with the bottom drain plug if desired.

Cost: \$69 each

Flex Elbow

Our Flex elbows come in white or brown and are attached to the downspout and used to direct the flow of water from the downspout to the rain barrel.

Cost: **\$4.95 each**

Rain Barrel Connector

Ready built 12" rain barrel connector. The rain barrels will connect through the top overflow valves.

Cost: **\$3.95 each**
